Achmad Fajar

Junior Web Developer | Dicoding Bootcamp Graduate
Cianjur, Jawa Barat, Indonesia

Ringkasan

I am a Junior Web Developer passionate about creating modern and user-friendly web applications. I completed a 6-month bootcamp focused on React and backend development, where I collaborated on a capstone project to build a Book Review & Donation Application.

To strengthen my skills, I also work on personal projects, such as building a portfolio website with React, TailwindCSS, and Framer Motion. These experiences have helped me improve my technical abilities and explore better UI/UX practices.

I am eager to grow as a professional web developer, contribute to impactful projects, and continuously expand my expertise in modern web technologies.

Pengalaman

Self Employed
Freelance Web Developer
Agustus 2025 - Present (2 bulan)

● Built a responsive profile page for a local pesantren using React, ensuring a clean, modern UI and cross-   device compatibility.

● Collaborated with a small team to translate client requirements into functional and user-friendly frontend solutions.

● Implemented component-based architecture to improve scalability and maintainability of the project.

● Coordinated tasks with the team and delivered the project on time while maintaining clear communication with the client.

Dicoding Indonesia

6 bulan

Full-stack Developer - Capstone Project
Juni 2025 - Agustus 2025 (3 bulan)
Bandung, Jawa Barat, Indonesia

● Collaborated in a team to design and develop a Book Review & Donation
Web Application.

● Built frontend using React, TailwindCSS, and backend APIs using Node.js,
HapiJs, and
PostgreSQL.

● Implemented user authentication, book donation management, and review
submission
features.

● Applied agile methodology, version control (Git/GitHub), and teamwork
practices.

● Tech Stack: React, TailwindCSS, Node.js, HapiJs, PostgreSQL, Git

Full-stack Developer Trainee - React & BackEnd Bootcamp
Maret 2025 - Agustus 2025 (6 bulan)
Bandung, Jawa Barat, Indonesia

● Built multiple responsive web applications using React, JavaScript, Node.js,
HapiJs, and PostgreSQL.

● Applied real-world development practices such as RESTful API design, state
management, and component-based architecture.

Collaborated in team projects using Agile methodologies, version control with
Git/GitHub.

● Completed a final project: a full-stack web application called Read & Gift,
which enables users to review books and donate books through an intuitive
and user-friendly interface.

● Enhanced skills in problem solving, code collaboration, and technical
communication through regular peer reviews and weekly presentations.
